**WHITE PAPER**

## CRYPTOCURRENCIES IN A NUTSHELL

Bitcoin is considered to be the very first form of cryptocurrency that was introduced by Wei Dai. Satoshi in 1988. Then in 2009, Satoshi Nakamoto devised the digital bitcoin. The basic rationale for designing the digital currency was to handle all the issues related to the commerce model and increased financial transactions. Traditionally, the financial reserves consist of the involvement of the third parties for processing the electronic payments. As a result of this model, nonreversible transactions are difficult and not possible for the financial institutions due to the personal disputes and reservations.

In order to overcome all these issues, Bitcoin was created to solve the processing through electronic payments. This cryptography based model allows the users to pay and control all of their transactions without the involvement of any third party. This eliminates the additional costs and advances as two of the willing parties will do the transactions without an external trusted network. The transfer of Bitcoin is as simple as sending an e-mail. All you need is to know how the internet works.

## BLOCKCHAIN TECHNOLOGY

Like any other model requires a solid and working supporting system, cryptocurrency needs a backbone known as Blockchain technology. It is a publically available ledger on peer to peer network that is distributed digitally. This innovative IT application registers transactions between the two parties and views the date, time and owner. It is a kind of public archive where all the information regarding the transactions are stored. This is automatically distributed among all the concerned authorities so as no one is the leader.

---

## PROBLEM STATEMENT

Cryptocurrency is a new concept in the field of money linked to digitalization. It still has to go a long way before it can be established as a mainstream money strategy. Mass market is a huge industry and there are many challenges and barriers that halt the process of adopting to new techniques. These barriers can be efficiently minimized through implementation of latest cryptocurrency conceptualization. Their embedment into the commerce will remove any obstacle thus providing with increased resources. The tourism industry has been spreading lately as more people are becoming aware and have developed interests for sightseeing and hopscotching. It is estimated that approximately 1.1 billion people have been travelling in the past couple of years. The need of payments and exchange of foreign currencies are some of the major barricades that tourists have to face during their journeys. What if you can pay your flight tickets, hotel bookings, food and other travel necessities through bitcoin or ether? This will save the trouble of changing your native currency to the destination's one and help to tap into the existing ecosystem of global ecosystem.

## OUR VISION

Tourist Token's vision is to incept an alternative for traditional banking that is accessible across the globe. We aspire to provide facility to tourists specifically; so that their money is safe and can be accessed swiftly and transact anywhere without facing the issues of foreign currency conversions. Though our token, people can easily make their reservations directly from their smartphone using the app. We aim to provide travelers with a digital wallet as a substitute for the debit or credit cards so that they can do their business online enabling them to use their cryptocurrencies at point of scale, anywhere in the world. Tourist token will serve as a native currency of MD properties and Travels LTD.

**TOURIST TOKEN WILL BE A DECENTRALIZED TRAVEL & REAL ESTATE AGENT  
THAT WILL SERVE MILLIONS OF TOURISTS AROUND THE WORLD.**

## **LIMITATIONS OF CURRENT BLOCKCHAIN ARRANGEMENTS**

As the cryptocurrency or bitcoin is a latest phenomenon so not all the merchants and tourist places have the knowledge. There are very few places who accept the bitcoin as an original currency. People have to first exchange their cryptocurrency into the local currency to make purchases at their travel destinations. This is not only time consuming and not acceptable by the owners most of the time. Some countries have taken the initiative and have introduced bitcoin strategy at their tourist attracting spots but they are a very few number.

## **TOURIST TOKENS SOLUTIONS**

Tourist Tokens tend to provide solutions to all the limitations of current blockchain technology that the tourism sector has to face. We aim to facilitate both the tourist and the local authorities in regards of the payment and acceptance of the digital currencies. Tourist Token will provide the following solutions to cater the currency demand and transactions:

### **1. It will overcome the Merchant Acceptance of Digital Cryptocurrency**

We have partnered with MD properties and Travel LTD. that will allow the digital wallet to be utilized at multiple locations provided by the companies.

### **2. It will Ensure Payments at Point of Sale**

Our self-made channels will provide a tourist token's liquidity pool that will instantly allow the point of sale purchases. This will save the tourists from the hassle of writing each payment transaction to the blockchain. A channel established between the customer and Tourist Token allowing the consumers real time transaction guarantee on the blockchain.

To use this system, the tourist is required to have a Tourist Token which grant access to the Tourist Token State channel and will be restricted to those who have the Tourist Tokens.

## GLOBAL IMPLEMENTATION OF TOURIST TOKEN SOLUTION

The solution that we provide can be implemented globally. Any tourist who has access to the digital wallet of Tourist Token can easily approach his account and make real time transactions. This functionality can only be availed through our specific tokens that offer 50% discounts on travelling ventures across the globe.

## ROADMAP OF THE TOURIST TOKEN

The step-by-step process:

### 1. Private Sale of Tokens

The first stage of the Tourist Token's roadmap will be to sale a number of 1,000,000 tokens through exchange to the willing tourists. This process of selling tokens to highest bidders will continue until exhausted.

### 2. Easy Access of Tokens

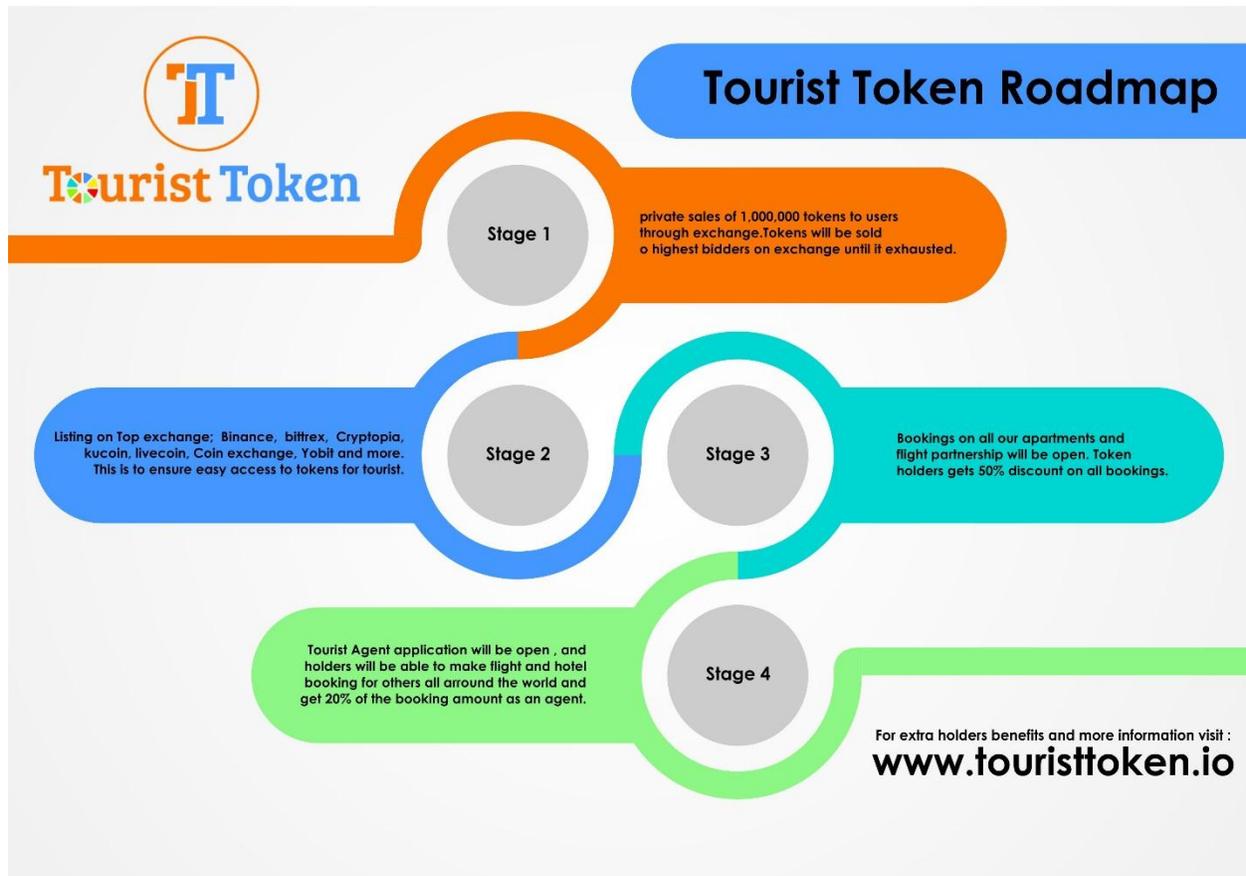

In order to ensure an easy and simple access to the tourists, the listing will be made on top exchange such as Binance, Bittrex, Cryptopia, Kucoin, Live coin, Coin exchange and Yobit.

### 3. Open Bookings

Bookings on all our apartments and flight partnerships will be open. Token holders will get a solid 50% discount on all bookings.

## 4. Tourist Agent Applications

Tourist agent applications will be open and holders will be able to make flight and hotel bookings for others; all around the world and get 20% of the booking amount as an agent.

## BENEFITS CONFERRED BY TOURIST TOKENS
